

THE GLEICHEN CALL

VOLUME 43 NO. 38

Authorized as second class mail,
Post Office Department, Ottawa

GLEICHEN, ALBERTA, WEDNESDAY DECEMBER 6, 1950

SUBSCRIPTION \$2.00 PER YEAR

Town & District

The chinook made a welcome change in the weather this morning.

The curlers have the curling rink in readiness for the season.

The Girl Guide tea and sale of home cooking last Saturday at the Recreation Centre was a great success. It was largely attended.

Hugh James has been appointed caretaker of the Curling Rink for this winter. He will assure tip top service to the curlers.

Regardless of the below zero weather the men who are erecting the addition to the U.G.G. elevator have made great progress and are now working at the top.

Mrs. Al Wilson has returned home after spending several weeks in a Calgary hospital recovering from a severe operation. On her return home she was accompanied by her sister Mrs. Bob Brown who had recently undergone an operation on her eye.

Mrs. Tom Hasketh has been on the sick list for the past week and is at present in the Bassano hospital.

Harvey and Don Bogatie are doing nicely after a siege of mumps.

At present the flu is making the rounds of the town and many are suffering from its effects.

Edgar Taylor, whose job is janitor for the school and bank is in bed suffering from a bad cold. Oliver Gilbert has taken over Edgar's duties.

Councillors who have an expensive time with worn roads might profit by this story. A visitor asked a local councillor: "How are the local roads?" "Fine," he replied. "We've abolished bad roads." "Big job wasn't it?" said the visitor. "Not at all," the councillor said. "Wherever the going is particularly hard, we don't call it a road. We call it a detour."

J. S. Hastings who was a newspaper man in the early 1900's contributed many famous sayings which are still used by current wits. Among them are the lines: "Every baby resembles the relative who has the most money." "Do right and fear no man; don't write and fear no woman" was another. Again, "Most husbands develop into pretty decent animals, considering the material their wives have to work with."

Canadians are warned by the government that they are liable to loss of their citizenship if they acquire citizenship in a foreign country while in Canada. The action was interpreted as a counter-move to pressure from several European countries to have natives of those countries renew their citizenship in them after becoming Canadian citizens. A statement from the citizenship department drew attention to an amendment to the Citizenship Act adopted last July, under which the government may wipe out the Canadian citizenship of those who voluntarily take up foreign citizenship while in this country except through marriage. Previously, Canadian citizenship was cancelled only when Canadians adopted foreign citizenship while outside this country. Aim of the measure, officials said, was to make clear to foreign born Canadian citizens that they cannot be Canadians and citizens of another country at the same time.

MAKE IT WITH PORK

The English language undergoes many changes as time rolls along. The usage of some words has altered completely and sometimes the meaning is almost the opposite of the original.

"Bacon" at one time meant the meat of pig whether fresh or cured, and all portions of the animal. The use of the word is now narrowed to mean only the cured side or back. "Pork" should cover all the flesh of pigs whether fresh or cured but in practice it usually applies to only fresh meat. Cured ham is called "ham" and the fresh meat must be designated "fresh ham." Whatever it is called the meat of the pig is an excellent food.

Fresh pork takes an important place on the meals served in many homes. It is a versatile meat and can be prepared in many different ways.

THE STATE OPENING OF PARLIAMENT

Their Majesties the King and Queen drove in state from Buckingham Palace for the opening of Parliament. Crowds lined the route of the state

parade from Buckingham Palace to the House of Lords. Their Majesties rode in the Irish state coach with the Sovereign's Escort of the Household Cavalry. On Arrival at the House of Lords a salute of 41 guns was fired and the Royal Standard hoisted over the Victoria Tower in token of the presence of the reigning sovereign. This picture shows the Royal procession leaving Buckingham Palace on the way to the House of Lords.

is one of the most skilled jobs in the factory. The stone then goes through various processes of boring, turning, grinding and polishing until it emerges as a highly-polished curling stone.

Most of the processes are done by machinery, much of which was invented and patented by the founders of the firm. Average weight of a curling stone is 40 pounds. One of the most delicate jobs in its manufacture is the making of the bearing edge on which the stone skims along the ice. This is a small, raised rim.

There's a different type of bearing edge for stones used on outside and indoor ice. This edge can be sharpened when it becomes worn. There's no limit to the life of a curling stone. Many of the clubs and firms in Canada and the States which order curling stones from Mauchline also order balmoral bonnets and broom for "scooping" them up. So many requests came into the factory for these accessories that the factory now stocks them. Average price of a pair of curling stones in Scotland is \$40 plus purchase tax. The factory produces about 2000 pairs of curling stones a year.

BROTHERS MAKE CURLING STONES FOR WORLD IN SCOTLAND

Behind Poosie Nansie Inn, Mauchline, famous home of Burns' Jolly Beggars lies the only curling stone factory in the world.

Chief foreign customers are Canada, United States, Switzerland and Sweden.

Curling was first played in Scotland so it is fitting that most of the stones sold to the home market stay in Scotland. The game is still far from more popular there than in England.

The granite comes from Ailsa Craig, "Paddy's Milestone" as this island is often called, lies in the Firth of Clyde, 10 miles out from Girvan.

It's a dangerous job quarrying the granite. The men who bore the rock before it is blasted often work suspended down the face of the quarry by ropes.

The factory started about 100 years ago is now owned by the brothers Charles and R. W. Wyllie. Most of the dozen or so workers have been in the factory since they were boys.

First job done with the granite blocks at Mauchline is "matching" as a pair of curling stones must be of the same color and texture.

Rough-hewing comes next. This gives the stone a rough shape, and

is one of the most skilled jobs in the factory.

The stone then goes through various processes of boring, turning, grinding and polishing until it emerges as a highly-polished curling stone.

Most of the processes are done by machinery, much of which was invented and patented by the founders of the firm.

Average weight of a curling stone is 40 pounds. One of the most delicate jobs in its manufacture is the making of the bearing edge on which the stone skims along the ice. This is a small, raised rim.

There's a different type of bearing edge for stones used on outside and indoor ice. This edge can be sharpened when it becomes worn. There's no limit to the life of a curling stone.

Many of the clubs and firms in Canada and the States which order curling stones from Mauchline also order balmoral bonnets and broom for "scooping" them up. So many requests came into the factory for these accessories that the factory now stocks them.

Average price of a pair of curling stones in Scotland is \$40 plus purchase tax. The factory produces about 2000 pairs of curling stones a year.

After a hard day in a curling stone works the brothers seek relaxation in the same pastime—curling.

SUPPORT DEMANDS FOR LOWER LICENSE FEES

Discussion at the recent caucus of Social Credit members in Edmonton has given rise to strong hopes that a reduction in motor license plate fees will take effect in 1951.

The subject was thoroughly discussed, while various suggestions were made. Some members thought a reduction of an average of \$5 per car should be granted at least, while some felt that the cut should be even larger, under the circumstances with bulging provincial revenues.

Nevertheless, it was indicated that there was a strong feeling on the part of the caucus that a reduction in license fees was warranted.

While there was a suggestion that the reduction should be made on the nine cents a gallon gasoline tax, it is believed that the lowering of cost will apply instead to license plates and thus give direct relief to Alberta car owning residents.

The Alberta Motor Association has made strong representations to the provincial government in advocating a substantial reduction in plate fees, having suggested that a flat rate of \$10 per car, as in Ontario, should be put into effect in the new year.

Support for the A.M.A. stand has been expressed by different organizations, and by locals of the Farmer's Union of Alberta.

Simplicity truth and persistency are three factors that build success in advertising.

Nowadays the electric switch makes things go. In the olden days they used the flicky switch.

DRUNKENNESS IS NO EXCUSE

"I didn't know what I was doing. I didn't really intend to hurt him" "to crash into the car" "to commit murder" "to leave my child" "to hit that policeman"

"You see your honor I was a little high!"

"I was intoxicated."

"I was under the influence of liquor..."

"I didn't mean to" "The act was not premeditated."

In intoxication as an excuse twisted and turned this way and that, but still an excuse.

Something to lean on when common sense has gone.

An appeal to the court on the ground that all men have this common failing and you, Your Honor, know that a man is not quite all there when he is drunk and shouldn't, therefore, be held responsible for what he does.

When is all this nonsense in our courts going to stop?

Drunkenness is no excuse and never can or should be held as such.

Drunkenness is a cause.

A man or woman who, when intoxicated, damages, injures or kills is and should be just as liable as the man or woman who, when sober, damages, injures, or kills.

To the dead child it makes no difference whether its killer was sober or intoxicated.

If anything a sober killer is more

likely to have taken precaution to avoid the death. The drunk killer is a killer whether in a car or with a gun or knife in hand.

The "key men" of the SIGNALS

Because its job is communications — radio, electronics, telephony — the work of the Royal Canadian Corps of Signals is vital to the Canadian Army Active Force. Today — when the Canadian Army is growing rapidly to forestall any threat to our freedom — the Signals Corps must grow too.

Men are needed urgently to begin training immediately as Signals Corps operators young men, quick-thinking, eager to master the skills that Signals operators must have.

The Canadian Army needs more men now. Signals must have more operators today! There's a place for you in this all-important corps. Canada needs you now! Report immediately for Active Force duty with the Royal Canadian Corps of Signals.

TO ENLIST YOU MUST:

1. Be a Canadian citizen or British subject.
2. Be between 17 and 29 years of age.
3. Be single.
4. Meet Army test requirements.
5. Volunteer for service anywhere.

REPORT RIGHT AWAY TO:

No. 10 Personnel Depot, Currie Barracks, CALGARY, Alta.

Headquarters, Western Command, Kingsway Ave., EDMONTON, Alta.

New Farm Director

THE RECENT APPOINTMENT OF Dr. E. S. Hopkins to the position of director of the Dominion Experimental Farms was of interest in agricultural and scientific circles throughout Canada. Dr. Hopkins succeeds Dr. E. S. Archibald, who retired a short time ago. A native of Lindsay, Ontario, Dr. Hopkins is a graduate of the University of Wisconsin and of Cornell University, in science and agriculture. He joined the staff of the Ontario Department of Agriculture in 1911 as agriculture representative, and he was later an instructor in the school of agriculture at Vermilion. His studies at Cornell University had included work in soil chemistry and he has been associated in soil surveys in a number of the provinces, including Alberta.

Is Fourth Man To Be Director

In 1920, Dr. Hopkins was appointed Dominion Field Husbandman and took up his duties at the Central Experimental Farm at Ottawa, where he directed experiments involving farm machinery, fertilizers and crop rotation. For the past twelve years, he has been associate director of the farm system, and acting director when Dr. Archibald was away. He is the fourth man to become director of the Dominion Experimental Farms since they were established in 1886. Preceding him in the position were Dr. William Saunders, famous for his grain research, Dr. J. H. Grisdale and Dr. Archibald.

Work Of Value To Farmers

Dr. Hopkins' new duties include the direction of the 1,200 acre Central Experimental Farm at Ottawa, as well as the 28 branch farms, 24 sub-stations, and 10 branch laboratories in operation in the provinces. The importance of making use of advanced scientific methods in farming is recognized, and the Dominion Experimental Farms contribute extensively to the progress in agriculture in Canada. In addition to the research carried on at the Central Experimental Farm, problems peculiar to special regions are studied at the branch stations and this work has proved of value in many localities across the country. Dr. Hopkins brings wide knowledge and experience to his new position and will carry on the work of the large organization of which he is now the head, toward the continued advancement of agriculture in Canada.

Big Drop In Alberta Sheep Population

EDMONTON. — Alberta's sheep population has dropped 860,000 during the last five years, R. E. English, statistician for the provincial department of agriculture, announced.

Coyotes, lack of suitable feed, high prices for breeding stock and better prices in other farming was given as the cause.

In 1945 the sheep population of Alberta was 875,000 compared with 114,000 this year.

Increased prices of wool and mutton this year probably will increase the province's sheep population within the next two years, Mr. English said.

Horse And Dogs Have Easy Life From Estate

WINNIPEG. — Two shaggy dogs and an old horse are living a life of leisure here.

Shep and Bounce, the Collies, and Rock, a 17-year-old horse, inherited a \$5,160 estate when their mistress, Mrs. Elinor Scott, died at Fisher Branch, Man.

Friends of Mrs. Scott, who have been taking care of the animals, said the elderly farm woman had lived alone with her pets for many years. When they die, the estate will go to the Fisher Branch hospital.

ORIGINATED IN COCKFIGHTING

Crow, used in the sense of bragging, originated in cockfighting, where the victor crowed in triumph over his opponent.

HUSKY BABY?

Help Keep Young Bodies Strong and Well

Mothers—to help your baby to have sound teeth, strong bones and a more husky body, give him pleasant-tasting, easy to digest Scott's Emulsion. Scott's Emulsion contains the Natural Vitamins A and D with other essential elements that babies and children may need for proper growth. That's why so many recommend Scott's. Buy the large economy size to-day!

Funny and Otherwise

"So your name is Muggins and you want to change it to Cavedog. Tell me why you want it changed."

"Well, to tell the truth, it was my wife's idea. She thinks we ought to have the same name that is on our spoons."

The pastor in an impoverished parish in the hill country wrote so often to the bishop of the diocese, asking for aid, that the bishop finally grew exasperated and wrote a sharp letter to the pastor, demanding an end of such appeals.

For several weeks, there were no more letters from the pastor, then one day the bishop received a terse note which read: "This is not an appeal . . . This is a report . . . I have no pants."

A certain beaver was once discussing beverages with a fellow club member.

"Have you ever tried gin and ginger beer?" asked the young fellow.

"No," replied the magistrate, "but I've tried a lot of folks who have."

"Look here, waiter. I found a hair in this turtle soup."

"Well, well, so the turtle and the hair finally came together."

Juggins: How do you get on with the boss, old man?

Juggins: He's about the meanest man I know.

Juggins: How's that?

Juggins: He's had the legs sawn off the wheelbarrow so that I can't sit down and rest.

"Every Sunday you go fishing," she complained, "and you know I don't like fish."

"Well," said he, "I catch as few as possible, don't I?"

Colonel (in crowded train): I say, porter, weren't you packed like sardines here. Can't you do anything to relieve us?

Porter (old soldier): Try numbering off to the right, and let the odd numbers breathe in while the even numbers breathe out.

Tommy: Mother, if baby swallowed some tadpoles would it kill him?

Mother: It might, dear.

Tommy: But it hasn't, mother.

A small boy announced to his teacher that next Tuesday would be his birthday.

"Isn't that nice?" she beamed. "It's my birthday, too."

His face clouded and he said resentfully, "Well, how did you get so much bigger than me?"

An envelope returned by the dead letter office to a Sydney business man carried this cancellation:

"Deceased, address unknown."

And then there was the English charwoman, married to the laziest man in the Bowbell district, who told a friend: "I'll stay this about my 'Arry—he's a gentleman at 'eart. He hits work."

Who was it said: The reason a dollar won't do what it once did is because people don't do as much for a dollar as they once did?

A joint checking account is a device that allows your wife to beat you to the draw

FORT CHURCHILL INVADERS LOSE BATTLE — Youngest and smallest of the three bears that invaded the sub-Arctic air base at Fort Churchill, Churchill, Man., gave Capt. G. A. York of Vancouver the thrill of a lifetime by charging into the captain's rifle fire. The 500-pound baby bear and two others roamed around the Fort Churchill camp until a group of hunters took after them in jeeps. Capt. York, shown here with his raw material for a bearskin rug, downed the polar in two shots. One other bear was killed—the third escaped.—Central Press Canadian.

More Airmen Receive Canadian Forces' Decoration

OTTAWA.—The names of another group of R.C.A.F. officers and airmen who have been awarded the Canadian Forces' Decoration were released by Air Force Headquarters. Some of the recipients are now retired from the service.

The Canadian Forces' Decoration is awarded for 12 years' service in either the Permanent or Reserve Forces, and is the first purely Canadian decoration for service of this nature. It is common to all the Armed Forces and supersedes various local service and good conduct awards peculiar to individual services, and which had no distinct Canadian connection.

Following is the list of Western officers and airmen who will receive the award:

GC R. A. Cameron, Oak Lake, Man.
GC J. B. Harvey, AFC, Winnipeg, Sask.
WC J. L. Beren, AFC, Qu'Appelle, Sask.
WC A. B. Searle, AFC, Lashburn, Sask.
WC D. J. G. Jackson, Plunket, Sask.
WC D. R. Miller, AFC, Saskatoon, Sask.

300,000 TONS OF WHEAT TO INDIA

WINNIPEG.—The Canadian wheat board announced it has sold 300,000 tons of wheat to India.

W. C. McNamara, assistant chief commissioner of the board, said shipment of the wheat already has begun from Vancouver and New Westminster, B.C.

The wheat, predominantly of grades No. 3 and 4 Northern, was sold at current prices, Mr. McNamara said. The shipment will be completed within a six-month period.

THREAT FOR FUTURE

BRANDON, Man. — Now that the mosquito season is past, Dominion Entomologist R. D. Bird thought it safe to announce that at least 12 varieties of mosquitoes are found in the Brandon area. He supervises Brandon's annual anti-mosquito campaign.

There are 172 clocks in the new British House of Commons.

Direct bidding paid on this hand from a duplicate pairs contest. If North raised One Heart to Two, East could not bid, vulnerable at the Three level, and South could jump to game as one of his six losers was discounted by his extra length in trumps.

At some tables North gave the pointless response of One Spade, enabling East to bid Two Diamonds and indicate the killing lead against Four Hearts. On a Spade lead, unless West shifts to Diamonds after winning with ♠ A, South has time to set up his Clubs and discard dummies ♠ 3. A Club lead makes things easier still, in fact several declarers made 11 tricks by squeezing East in Spades and Diamonds when neither of these suits was attacked in time.

Governor-General To Take Up Farming

OTTAWA. — Viscount Alexander said he's going to become a farmer when he gives up his job as governor-general of Canada. Opening the national headquarters of the Agricultural Institute of Canada, he confessed he is no expert agriculturist, but intends to "take up farming in real serious style" when his official duties end. His term recently was extended to the spring of 1952.

Western Grain Growers Were Major Winners At Chicago

CHICAGO.—R. P. Robbins of Shaunavon, Sask., won the title of wheat king at the hay and grain show of the International Livestock exposition. He won the crown with a sample of Durum wheat.

Chris Morck of Dickson, Alta., won the rye king title with a sample of rye which earlier this month won him the world rye championship at the Royal Winter fair. His entry here was judged the best of 15 entries.

John T. Elkuk of Hairy Hill, Alta., was judged barley king. The reserve championship went to L. E. Peterson of Victor, Mont.

Louis Wendell of Neudorf, Sask., won the title of oats king.

Chris Larsen of Badger, South Dakota, was judged flax champion. Second place went to R. F. Gunkleman of Fargo, N.D., and third to Fred Palaschak of Worthington, Minn.

Runner-up in the rye contest was Harold Buscho of Morton, Minn., Albert Kessel of Rosetown, Sask., the 1949 rye king, was third.

Also decided was the corn championship, won the second straight year by Charles M. Fischer of Shelbyville, Ind.

Robbins' win in wheat marks the first time since 1931—when Herman Trelle of Wembley, Alta., won the wheat crown—that an exhibitor of Durum wheat has been named wheat king.

It is only the second time since the

grain show started in 1919 that the winner of the competition for hard red spring wheat has not also been judged wheat grand champion.

The reserve championship award in wheat went to Margaret L. Pew of Coshocton, O. One of six finalists, she topped her class in the soft red winter class.

Mrs. Amy Kelsey of Victoria, last year's wheat queen, topped the red spring wheat division with her sample of Reward and had been favored to become the fourth person in the grain show's history to win the wheat crown three times.

The first major prize of the grain and hay show was captured by Harvey L. Steigemeier of Normal, Ill., who was acclaimed soybean king.

He won the soybean championship with a certified Adams' variety which was developed by the Iowa experimental station at Ames. He said it averaged 42 bushels an acre, four bushels more than any other variety he grew on his 330-acre seed farm in central Illinois.

YOUR NEIGHBORHOOD FUEL DEALER HAS DIPLOMAT

—By Les Carroll

OUR COMPLETE SHORT STORY—

THE FAR TRAVELERS "Don't Talk About It."

By Louis Arthur Cunningham

KEN MILLER loved to eat at the Stamboul just because one saw there, from time to time, girls like this one. You could tell at a glance she had been everywhere. It was written all over her. Then her eyes, those deep blue eyes that went with silky Norse-blond hair, had a blue borrowed from the sky above Sorrento, from the sea along the Cote d'Azur. You couldn't fool Ken Miller. He knew all these places—yes, and a thousand others. The best hotels, the finest restaurants, the shortest routes. He had it all at his finger tips. So, he knew, did she.

Lucky that the Stamboul was crowded, a stroke of sheer good fortune that he had to sit at her table. He thought—this before she looked up—how wonderful to sit at her table at the Chalet St. Yves in the shadow of the Jungfrau or in Les Trois Canards in that crooked street in Montmartre, or in Hjalmarsson in the land of the midnight sun. Then the blue eyes lifted and he thought, how wonderful to sit with her anywhere, even in a two by four breakfast nook in the Bronx or Plainfield, New Jersey.

She had been glancing over a travel folder—one always found them lying around the Stamboul—she closed it now and put it aside. He saw the name—Riviera; and it gave him an opening, and the blue eyes were pleasant.

"Not much fun now at Nice or Mentone or St. Jean de Luz," he said. "The air is too supercharged."

She nodded. "I was thinking of Chamonix, or a little place called Oberwalden."

"Where there's an inn called the St. Cunegonde that is just as it was when Charlemagne once stopped there."

"You know it!" Her eyes were glad. "Everybody sings there and in the inn on a winter night you can hear folk-songs centuries old—"

"Tales of witches, goblins and werewolves. And it costs next to nothing—it's so far off the beaten track—and the wine second to none."

"Second only to the Burgundy at le Petit Renard in St. Remi de Grandcourt in Bas Bretagne."

"That's so," he agreed. "Or at le Coq d'Or in Perpignan."

She smiled. "And you pay—plenty."

"For everything," he admitted. "I think," she said pensively, "that I'd take Alaska this year anyway. You're pretty sure you're going to get back safely and if you use the Green Star boats you have about all you need."

I'd prefer the Blue Funnel," said Ken. "Of course I'm more familiar with them."

The waiter came then and he list-

ened, enraptured, while she handled the menu with an accent to rival the best Parisian. He wasn't at all ashamed of his own French and he ordered with an assurance that sent the waiter, who came from Weehawken, into respectful raptures.

"I like it here," he said, producing his cigarette case. "It gives you a bit of the Left Bank, a touch of Montparnasse—and one sometimes meets people, like you, with whom one can talk about familiar things. Just now I'm thinking of the big game fishing in Nova Scotia."

"Don't talk about it." She made a little face and her eyes were wistful. "You make me think of Yeats—I will rise and go now—"

He smiled. "But that's to Innisfree. What about that trip on the little donkeys through the Cap of Dundee?"

"Give me a jaunting car in Wicklow or a boat on the Lakes of Killarney."

They went from Killarney to John o' Groats, from there to Rio de Janeiro, from there to Canberra and so to Singapore. And they didn't eat much; they were too happy visiting. She had Marco Polo beat a mile, this slim girl with the eager voice. How he wished that they might travel on forever. She wore no ring. His heart skipped a few beats. On the Danube with her—he could hear the glorious music of Strauss; or on the Grand Canal, and a rich Neapolitan voice singing Santa Lucia—

"I must go now." She glanced at her watch. A train, a boat to catch—to Montreal, to Nassau, to Hollywood or Havana. "It's been grand talking to you. Perhaps we'll meet again. My name is Wanda Rave."

"Mine's Ken Miller. Perhaps we'll meet in St. Moritz or in Naples."

"Who knows?" He could not take his eyes from her face. "Maybe in Shanghai or Cairo."

"To that day!" He raised his glass.

"To that day!" She raised hers. Then she was gone and the Stamboul was just a place to eat, a few blocks from Times Square, and Ken was late for work.

Reinhardt, manager of the Nomad Travel Tours, Inc., scowled when he hurried in. "Say, you! What are we paying you for? Take these sheets over to World Tours and ask Brewer what he means by horning in our See Alaska Special. Make it snappy."

Ken made it snappy. He thought of her of the blue eyes and Norse-blond hair. Probably speeding north now, or south, or east, or west. Ah, well, someday—

She was on the desk at World Tours, Inc. The nameplate said Miss Wanda Rave. So she was the girl who had been transferred from the Boston office.

"Say!" he said joyously, forgetting all about Brewer. "Is this a break! I'm with Nomad and you—you're here! How about a ride on top of a bus tonight?"

The long lashes fluttered over the blue, blue eyes. "I'd love it." (Copyright Wheeler Newspaper Syndicate)

COMBINED WHEAT COVERED WITH SNOW

Dennis Hall, a farmer in the Davis district, 15 miles southeast of Prince Albert, Sask., has been combining wheat over the snow. He harvested 500 bushels and has 250 acres of unharvested which he intends to leave until spring. He'll get 16 cents a bushel less for his grain because it is damp. Says he: "But it's better than losing the entire crop."

Ricky Sharpe, "Wheat King" Got Royal Welcome at Toronto

The following written by Wessely Hicks, of The Toronto Telegram, who was on hand at the station to meet Ricky Sharpe, of Munson, Alta., who was invited to Toronto to receive the "Wheat King" crown.

"The wheat king of the world, a slim modest fellow wearing a green and white windbreaker and a smile as bright as the early morning sun which was on hand to welcome him, arrived at Union Station this morning."

Ricky Sharpe, the 18-year-old kid from Munson, Alta., who is the first member of a junior grain club to cop the world's wheat title in the 28-year history of the Royal Agricultural and Winter Fair, created a buzz worthy of a sovereign when he ambled out into the foyer of the big station.

A big rugged man in a dark over-

look on his face of a father whose son has just run 100 yards for a touchdown. He was beaming.

Ellen Sharpe was shiny-eyed. She looked like a mother who is so proud of her son she could cry a little.

The champ was unperturbed. The exploding photographer's flash bulbs, the bustle and stir, the excitement, the greetings and the crowd were somewhat of an anti-climax for Ricky.

After all, he had taken over the throttle of Engine 6077 from Engineer Fred Culverston at Oriole and guided the snorting black giant the last 26 miles of its transcontinental journey into Toronto.

After all, he is the wheat king of the world and can really expect to be fussed over.

After all, a kid whose big interest in life is farming could brush off a

RICKY SHARPE, 18-year-old world's champion wheat king from Munson, Alta., is shown at the world grain championship presentation ceremonies, held at the Royal Agricultural Winter Fair, recently held in Toronto, where he received the C.N.R. trophy, emblematic of the world's wheat growing championship, as well as an engraved silver tray and cheque. From left: A. J. Lomas, vice-president, central region, C.N.R., who presented the awards to Ricky on behalf of the railway; Lord Digby, D.S.O., M.C., deputy president, Royal Agricultural Society of England, who opened the grain show, and Ricky.

coat and navy blue homburg was the first to reach the wheat king and shake his hand. The big, rugged man was Ontario Agricultural Minister Tom Kennedy, a farmer of some repute himself, who had driven in from his farm at Dixie to welcome the champ.

Behind the champ came two persons who are prouder than he of what he had accomplished. They were Roderick and Ellen Sharpe, the champ's parents.

Roderick Sharpe tills a 480-acre farm near Munson, Alta. Today, Roderick Sharpe had the big, proud

little fuss when the finest collection of farm animals and farm products on the continent were waiting for him in the Coliseum at the Royal Agricultural and Winter Fair.

When it was first announced that Ricky had won the world's championship with the samples of his wheat growing artistry submitted to the Royal Winter Fair, there was a real stir of excitement among Western wheat growers. Because Ricky's submission was labelled as Thatcher wheat, the species favored by prairie wheat growers, and Thatcher wheat has never won a major award. Always it has been nosed out by Marquis and Reward.

Then a shamefaced district agricultural representative at Drumheller, Alta., where Ricky belongs to the Junior Grain Club, admitted that he had made a mistake. The wheat is Marquis, he admitted.

Ricky bore no grudge. "Anybody can make a mistake like that," he said. My wheat is Marquis alright."

This is the third year that Ricky has contested the world wheat championship. Last year, he was reserve champion and junior world champion.

This year, he is world's champion. He also retained the junior wheat championship.

Ricky had a jolt for hockey fans who think that on Saturday nights the world revolves around the Toronto Maple Leafs and their shiny contests at the Maple Leaf Gardens. Ricky isn't very particular about seeing the Leafs play.

He shook his head quickly when asked if he were going to see the Leafs-Rangers game.

"Nope," he said. "There are some good horses out at the Fair, they tell me—and that's where I am going to be. I want to see the horses."

Later, Ricky had a few words of advice for aspirants to his world wheat crown.

"You've got to be ready to do a lot of hard work," he said. "You have to plant the wheat, tend it, harvest it, sieve it, sort it, and polish it. It takes a lot of work."

Rick said the 18 pounds of Marquis wheat, which is the product of a 3½-acre plot and which won him the world title, was the product of months of hard work. And he worked three hours a day for three weeks to sort the thousands of kernels for his entry. He spread the kernels out on his mother's kitchen table and patiently, carefully, removed the white ends from each kernel.

Then, with even greater patience, he polished each kernel so that it shone bright and golden.

But the champ is not going to compete out of his class, which is wheat.

"Anything else but wheat is too hard to pick over," he said. "My eyes went blurry picking over the wheat."

WESTERN BRIEFS

\$70,000 Locker Opened

ANERIOD, Sask.—A new \$30,000 locker plant and store has been opened here. Total floor space is almost 2,000 square feet.

New Farm Group

WASKEDA, Man.—District farmers have formed the Waskeda branch of the Farmers' Protective association. Field secretary L. C. de Gagne said it is essential that unorganized prairie farmers have representation at Ottawa.

Use Of Airport Granted

FLIN FLON, Man.—Mayor Stevenson announced that a temporary certificate for use of the Flin Flon airport has been granted. The airport recently has been extended to allow landing of planes larger than those originally on the Winnipeg-Dauphin-The Pas run.

Elk And Deer Collide

PENNANT, Sask.—Elk and deer collided at the junction of No. 32 and 4 highway recently and the result was disastrous for both. The deer bounded into the path of a car carrying members of the Pennant Elk club to Swift Current. The deer died and the car was wrecked.

Sees Jet Transports

VICTORIA, B.C.—Jet-propelled transport aircraft, flying at 50,000 feet, will be in regular service within 18 months on Trans-Pacific routes out of Vancouver, Grant McConachie, president of Canadian Pacific Airlines, said.

Quits As Coach

VANCOUVER—Orville Burke, formerly of Ottawa Rough Riders, announced his resignation as coach of the University of British Columbia football team. He gave pressure of business as his reason. He has coached the team for the last two seasons during which they have won only one of 15 games played.

Frozen Wheat Does Well In Germination Tests

WINNIPEG.—Provincial Agronomist P. H. Ford said that germination tests on frozen Manitoba grain show wheat apparently germinating fairly well unless it was frozen while in a very immature stage.

He said the amount of damage to germinating ability depends on the stage at which the grain was frozen. Oats, if frozen near maturity, are not germinating satisfactorily. If hit by frost when quite green and later matured, germination appears good.

VALUABLE RECORDS SOLD AT AUCTION

A well-bound volume containing what is believed to be the first map of Hudson Bay, was sold at auction in London for \$420 (about \$1,280). Published in Amsterdam in 1612, the book also contains writings in Latin by Henry Hudson. These are believed to be the first printed accounts of the explorer's discoveries in North America. 2910

Farmers Lost Millions From Frost Damage

OTTAWA.—Western farmers lost up to \$200,000,000 on what might have been their third biggest wheat crop in history because of frost damage and changing world markets.

A Department of Agriculture report prepared for next week's federal-provincial farm production conference showed that frost cut this year's crop from a possible 544,000,000 bushels forecast in August, to 465,000,000 bushels.

The crop's quality was slashed by frost damage.

Last year's output of 368,000,000 bushels graded out 85 per cent. in milling grades, but this year's will be much less useful for baking and export.

The Federal agricultural department made no official estimate, but western grain trade authorities said probably 50 per cent. of this year's crop would be below milling grade. Most of it could be used only for feed purposes, although some low-grade wheat might be sold on the domestic market as second-rate flour, grain trade sources said.

This year's western wheat crop will be sold overseas under the international wheat agreement, which set a top price of \$1.80 per bushel for best grade grain. The government's action in setting the Canadian dollar free on world markets meant that western families would get only about \$1.80 to \$1.90 in place of the earlier IWA price of \$1.98 in Canadian funds.

The world wheat agreement prices are worked out in United States funds.

Because of the frost damage and the lowered dollar value of the crop, western farmers probably will receive \$420,000,000 to \$440,000,000 for export wheat this year, Federal statistics showed.

Last year, when wheat was being sold to Britain under the Anglo-Canadian wheat agreement at a top price of \$2.00 per bushel and farmers had better wheat to sell, they received about \$800,000,000.

A HEAVY NECKLACE

A gold and silver necklace probably worn by a British chieftain nearly 2,000 years ago has been plowed up in a field near a Norfolk village. Weighing more than two pounds, it is thought to be part of a hoard of ancient relics found only 50 yards away two years ago.

WAKE UP YOUR LIVER BILE—

Without Colman's—And You'll Jump Out of Bed in the Morning! It's So Good!

The liver should pour out about 3 pints of bile juice into your digestive tract every day. If this bile is not flowing freely, your food may not digest. It may just decay in the digestive tract. Then gas builds up your stomach. You get constipated. You feel sour, sick and the world looks pink.

It takes those mild, gentle Carter's Little Liver Pills to get these 3 pints of bile flowing freely to make you feel "up and up." Get a package today. Effective in making bile flow freely. Ask for Carter's Little Liver Pills, 50¢ at any drugstore.

Looks pretty—Tastes pretty WONDERFUL!

Fruit Bread—made with New Fast DRY Yeast!

KNOBBY FRUIT LOAVES

● Scald 1½ c. milk, ¼ c. granulated sugar, 2 tps. salt and ½ c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ¾ c. lukewarm water, 3 tps. granulated sugar; stir until sugar is dissolved. Sprinkle with 3 envelopes Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Add lukewarm milk mixture and stir in 2 well-beaten eggs, ¼ c. maraschino cherry syrup and 1 tsp. almond extract. Stir in 4 c. unsifted bread flour; beat until smooth. Work in 2 c. seedless raisins, 1 c. currants, 1 c. chopped candied peels, 1 c. sliced maraschino cherries and 1 c. broken walnuts. Work in ¾ c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and

grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Punch down dough, turn out on lightly-floured board and divide into 4 equal portions; cut each portion into 20 equal-sized pieces; knead each piece into a smooth round ball. Arrange 10 small balls in each of 4 greased loaf pans (4½" x 8½") and grease tops. Arrange remaining balls on top of those in pans and grease tops. Cover and let rise until doubled in bulk. Bake in moderate oven, 350°, about 1 hour, covering with brown paper after first ½ hour. Spread cold loaves with icing. Yield—4 loaves. Note: The 4 portions of dough may be shaped into loaves to fit pans, instead of being divided into the small pieces that produce knobby loaves.

I Was Nearly Crazy With Fiery Itch—

Until I discovered Dr. D. D. Dennis' amazing fast relief—D. D. D. Prescription, World famous, this pure, cooling, liquid medication speeds peace and comfort from cruel itching caused by eczema, pimples, rashes, athlete's foot and other itchy troubles. Trial bottle, 35¢. First application checks even the most intense itch or money back. Ask druggist for D. D. D. Prescription (ordinary or extra strength).

PREPARE FOR SAFE

WINTER DRIVING

Motorists are urged to have the safety equipment checked in their car and truck now before the weather shifts into high gear for winter. Look to these mechanical features:
EQUALIZED BRAKES reduce chances of skids when stopping on snow, ice and wet pavement.
TIRES with good treads are desirable, particularly for good traction when you need it.
CHAINS should be checked and ready for use on driving under snow and ice conditions.
LIGHTS FROST SHIELDS HEADLAMP WIPERS DEFROSTERS WINDSHIELD WIPERS should be checked and put in good shape for good visibility and driving comfort.

Be Careful - the life you save may be your own!

HERE AND THERE

This is directed to provincial and federal members of parliament and to senior civil servants. But even if the idea it suggests is essentially sound, it will need the support of electors all over Canada to put it into effect. Here is the idea. Would it not be more sensible for our federal and provincial government, in decentralizing their offices to locate in towns not already favored by expanding industrial growth. In other words why should not governments locate more branch offices in municipalities in which office space is less expensive housing easier to get and added employment. Certainly convenience in communication services is a factor in certain places but we wonder if this consideration is not more than offset by other gains.

This world, to say the least, is in a most unsettled state. No man can foresee what the future may bring but all signs point to a possible great struggle between those people in this world who believe in the dictatorial domination of the state, and those who believe in the traditional freedoms of democracy. Past history tells us in no uncertain way that countries which have valuable natural resources, or who are able by their talents and work to achieve a higher level of living than some others, must be prepared at all times to defend their precious possessions; or they will lose them. Adequate preparation for defence is the only possible way to avert a gigantic world struggle, or to give the democratic countries sufficient power to defend themselves and their way of life should the fierce struggle actually come. One of the most important means of defence consists of good crops of grain and good supplies of food. Every encouragement, therefore should be given to our prairie farmers to enable them to proceed to the fullest extent with the important and vital work of producing grain and food.

Even if you are on the right track you will be run over if you sit there.
The man who makes every minute count often becomes the man of the hour.

THE DESTRUCTIVE RAT

Public health authorities estimate that the actual loss caused by rats amounts to a billion dollars a year, of which about one-half is in foodstuffs and the rest in the destruction of other property.

The number of rats engaged in these depredations is estimated at 150,000,000, or about equal to the country's human population.

Besides the destructiveness of the rat is its constant menace to health through the transmission of disease especially bubonic plague which is spread entirely by fleas which infest infected rats. (While the disease has been held in check in countries employing preventive measures, bubonic plague killed more than 1,300,000 people in India during a 20-year period.

Public departments declare that if the extraordinary prolific breeding of rats were not partially controlled by natural enemies, disease and the cannibalistic tendencies of the animal itself, they would soon overrun the world and exterminate man by depriving him of his sources of food.

Like many other ever-present menace to property and health, the rat appears to be taken for granted and seldom is any concerted effort made with a view of its extermination.

NOTICE

In the matter of the Gas Resources Act, being Chapter 2, Statutes of Alberta, 1949 (Second Session), and amendments thereto and in the matter of the application of Canadian Delhi Oil Limited.

TAKE NOTICE that an application will be made on behalf of Canadian Delhi Oil Limited, to the Petroleum and Natural Gas Conservation Board, for a permit to remove gas or cause it to be removed from the Province of Alberta for use or consumption elsewhere than within the said province, but within Canada, under the provisions of the Gas Resources Preservation Act, being Chapter 2, of the Statutes of Alberta, 1949, (Second Session), and amendments thereto.

AND FURTHER TAKE NOTICE that the said Board has fixed the hearing of the application for the hour of 9:30 o'clock in the forenoon on the 8th day of January 1951, at the Court House in the City of Calgary in the Province of Alberta.

DATED at the City of Calgary in the Province of Alberta this 17 day of November, A.D. 1950.

Education - The Key To Progress

Your right to know is the door to a better economic, social and cultural life; and education is the key to that door.

It is the function of the Department of Education to keep abreast of modern trends in education, discarding impractical or outdated methods and ideas, in favor of standards and achievements to enable young people to take their place in society, confident in their own abilities and able through training to attain their goal.

Activities of the Department of Education include: development, operation or supervision of:

SCHOOL DIVISIONS: Large school divisions have been organized for efficiency of operation, to provide pupils with better facilities and to promote uniformity of opportunity for all. To each is appointed a superintendent to assist and advise trustees and teachers.

TEACHER TRAINING: Teachers are trained at the University of Alberta. A Board of Teacher Education and Certification advises the University and the Minister. Teacher qualifications have been substantially raised in recent years. To assist school boards in the establishment of a Teacher Retirement Fund substantial contributions are made amounting in 1950-51 to \$550,000.

AUDIO-VISUAL AIDS: This branch of the Department has built up a large library of sound films, silent films, filmstrips and slides available for classroom use, free. These cover a variety of topics in the Alberta School Curriculum. Circulation last school year exceeded 82,000 items, chiefly films.

CORRESPONDENCE SCHOOL BRANCH: This branch takes education to children in remote areas and those physically unable to attend regular schools. It also serves schools without teachers, and adults seeking self-improvement. Courses include full academic subjects, business law, bookkeeping and shorthand.

SPECIAL EDUCATIONAL SERVICES: Deaf and blind children are educated in special schools substantially free of charge. Special classrooms for children with defective vision, impaired hearing and other handicaps are generously supported. The Department also operates the Institute of Technology and Art in Calgary, the Nurses' Aides School, the Health and Recreation Program, and various projects under Canadian Vocational Training.

SCHOOL BOOK BRANCH: During its period of operation this branch has distributed over six million school books, either free or at a minimum cost.
